Notes

We rode north of Round Lake this morning (2/6/23)....

There was a small snowmobiler triggered [slide](#) on a convex bench between Sheep Mtn. and Round Lake that was triggered this afternoon. It was 1.5-2' deep, 30' wide, and looked to have broke on a [weak layer](#) below last week's snow, on a freshly wind-loaded slope. In a relatively shallow, rocky area (photo attached).
