## **Skier triggered slide in Beehive**

```
Beehive Basin
Northern Madison
2/14/2023
Code
SS-ASu-R1-D1
Elevation
8700
Aspect
SW
Latitude
45.34070
Longitude
-111.39100
Notes
```

In Beehive with AAI Pro 1. Storm snow measured at over 30 cm, roughly double what was reported at Big Sky/YC. 5% density. Wind Slabs slowly building from L to M N winds, both WS and Loose Dry touchy on all slopes steeper than 35 with a MFcr as the interface - basically everything W, S, E aspects below 9500 (probably above too but we didn't go that high). One skier triggered <u>wind slab</u> observed low in the "tyler's" <u>slide</u> path on a SW <u>aspect</u>, 8700 ft, 35 deg, SS-ASu-R1/D1-I. No evidence of active persistent <u>slab</u>, 11x pits @ 8500 SE, HS 170, ECTX for all.
